Experience

ScriptPro LLC, Software Engineer - March 2013 to Present

Develop pharmacy management software with a team that incorporates Agile/Scrum methodologies

Hosted on Windows Server 2008 R2

Served using IIS 7.5 over HTTPS connections paired with SSL certificates

SQL Server 2008 R2 database schema definition, function and stored procedure development

Server side application code is written in C# using the ASP.NET Web API, ASP.NET MVC, and WCF

Client side application code is written in HTML5 paired with Razor templates, Sass compiling to CSS, and JavaScript using libraries/frameworks such as jQuery, Knockout, Kendo UI, and AngularJS

Development is done using Visual Studio 2012/2013 Ultimate, Microsoft SQL Server Management Studio, and Team Foundation Server

Deployment is done through a pairing of Team Foundation Server and internal tools

ACEware Systems, Web Developer - February 2012 to March 2013

Developed continuing education software for the web

Hosted on Amazon Web Services EC2 instances running a Red Hat Linux operating system

Served using Apache Tomcat 7 over HTTPS connections paired with SSL certificates

MySQL database administration, schema definition, and stored procedure development

Back end application code was written in Java using the JSF framework

Front end application code was written in XHTML, Richfaces, CSS, JavaScript with jQuery

Development and deployment done via Eclipse IDE, MySQL Workbench, and the Linux command line
