Experience

ScriptPro LLC, Software Engineer - March 2013 to Present
   Develop pharmacy management software with a team that incorporates Agile/Scrum methodologies
   Hosted on Windows Server 2008 R2
   Served using IIS 7.5 over HTTPS connections paired with SSL certificates
   SQL Server 2008 R2 database schema definition, function and stored procedure development
   Server side application code is written in C# using the ASP.NET Web API and MVC 4
   Client side application code is written in HTML5 paired with Razor templates, Sass compiling to CSS, and JavaScript using frameworks such as jQuery, Knockout, and Kendo UI
   Development is done using Visual Studio 2012 Ultimate, Microsoft SQL Server Management Studio, and Team Foundation Server
   Deployment is done through a pairing of Team Foundation Server and internal tools

ACEware Systems, Web Developer - February 2012 to March 2013
   Developed continuing education software for the web
   Hosted on Amazon Web Services EC2 instances running a Red Hat Linux operating system
   Served using Apache Tomcat 7 over HTTPS connections paired with SSL certificates
   MySQL database administration, schema definition, and stored procedure development
   Back end application code was written in Java using the JSF framework
   Front end application code was written in XHTML, Richfaces, CSS, JavaScript with jQuery
   Development and deployment done via Eclipse IDE, MySQL Workbench, and the Linux command line
